PHARMA AEROSOL FILLING MACHINES

Aerosol filling machines for pharmaceutical applications are available in configurations ranging from **lab scale** units to **production scale**, suitable for **pMDI**, **nasal**, **oral**, and **topical** products.

LAB SCALE

Electronic / manual control of filling, valve crimping and propellant filling.

- Top production speed: 10 CPM
- Two head positions
- AISI 316L
- FDA, ATEX compliant
- 21CFR + validation protocols

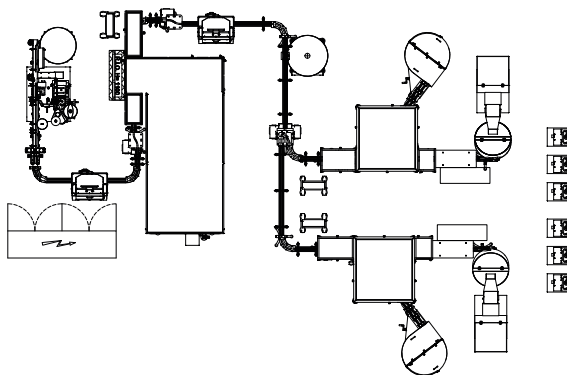

PRODUCTION SCALE

Complete lines with ancillaries for aerosol, BOV and pMDI (single and double stage).

- Top production speed: 150 CPM
- Valve purging after filling
- AISI 316L
- FDA, ATEX compliant
- 21CFR + validation protocols

COMPLETE LINES FOR PHARMA | LAYOUT EXAMPLE

- **Ancillaries:** feeding table, gas house, checkweigher, UV filtered water bath, accumulating table, actuators and caps placer, etc.
- **Cans diameter:**
 - pMDI: from 22 mm to 50 mm
- **Cans height:**
 - pMDI: from 40 mm to 125 mm

SERVICE & SUPPORT

- **Spare parts**
- **Maintenance** contracts
- **Assistance** to production services
- **Remote monitoring** and **support**
- **Training**

READY FOR GREEN PROPELLANTS

Advanced filling solutions ready for the transition to sustainable propellants in pharmaceutical applications.

- **Green-Ready Technology:**
Compatible with both traditional HFAs and low-GWP propellants.
- **Process Integrity:**
High-precision, safe, and reliable filling across all propellant types.
- **Regulatory Compliance:**
Aligned with global standards. Complete pharma validation and qualification support.
